

The Strata Bass is a unique blend of "State of The Art" technology and fine hand crafted quality.

These fine instruments incorporate a one piece moulding (Carbon Graphite and other fibres) as the central neck/body section with massive fittings machined from solid brass and fine hand-carved wooden body pieces. The Strata Bass is unique in many ways:—

**RIGIDITY** — The neck will not warp or twist and is not affected by temperature or climatic conditions. Superior quality phenolic fingerboards are used. Not only does this material add to the clarity and sustain of the bass but it is very much harder than ebony, being virtually indestructable.

**BRILLIANCE** — The clarity of sound must be heard to be believed. No other bass surpasses the brilliance or harmonic quality of the Strata Bass.

**SUSTAIN** — The Strata Bass incorporates precision made bridge/tuning assemblies machined from solid brass. These are then bolted directly **into** the moulding. The sustain is unbelievable!!

**STYLE** — The body tuning system has proven superior in every way to traditional style machine heads. The Bass is easier to tune, more accurate and more stable. It also allows the bass to hang in a perfectly balanced, more comfortable position. The body pieces are hand carved using exotic, book-matched timbers. These woods are imported from many parts of the world to add their unique beauty to these magnificent instruments!

**ACTIVE ELECTRONICS** — The pickups are unique to the Strata Bass and are the finest quality available at any price. By incorporating a pan-pot instead of a standard pick-up selector switch and active treble/bass-boost and cut controls the tonal range of the Strata Bass is virtually unparalleled. An active/passive switch is also fitted.

Fretted and fretless basses are available.  
All prices include moulded, custom fitted case.  
Six string guitars will be available shortly.
